Summary

I am working at Tayqatech as a Software Test Automation Engineer/QA Engineer/ IT Support Specialist position. I check our software products for defects and make sure client requirements are respected. I use POSTMAN for API testing, ability to use UI Exerciser Monkey in order to Automate Monkey testing. I am running automated test cases with Selenium, TestNg, and Appium using Java programming language. I use Android Debug Bridge to send commands to the ADB Daemon. and I am also running manual tests, gathering and analyzing test data, identifying bugs, and providing feedback to developers. Have experience with Jira Service Management, Confluence and Jira Software Understanding of TCP/IP and OSI Model.

Shortly: RTM, Postman, SQL, Java, Selenium, Appium, Extent Report, JIRA Service Management, Jira Software, Confluence, Linux, TestNG, IntelliJ IDEA, Android Studio, Maven, Gradle, UI Exerciser Monkey, Android Debug Bridge, Testing: Regression, Integration, Monkey, Smoke, Sanity, Functional

Experience

Test Automation Engineer at TayqaTech [2020.12.20-present]

As the Test Automation Engineer, I design, code and maintain test automation frameworks and test automation infrastructure. I am collaborative with our Agile team, working closely with Dev, DevOps, Quality Engineering and Support to automate testing, optimize our tooling, ensure test suites are robust & reusable, and improve the overall quality of what we deliver. I Collaborate with Agile teams from the start of a sprint to deliver best-in-class technical solutions. I also monitor automation processes and follow up on results/defects. I write test cases with java, verify bugs and perform manual testing as required . I am running automated test cases with Selenium, TestNg, and Appium using Java programming language

Software Quality Assurance Tester at TayqaTech [2020.11.23-present]

I have a passion for software quality that goes beyond just identifying bugs and ensures the product meets written and unwritten requirements, is consistent, is well designed, and is a delight to use. I thrive in fast-paced environments and am flexible in adapting to change. I execute quality assurance tests and document software defects. I use SQL for manipulating data, Identify, communicate and mitigate risks within each software release.

IT Support Specialist at TayqaTech [2020.11.23-present]

As an IT Support Specialist I Ensure Help Desk tracking and asset information is accurate. I document solutions to problems and recommend fundamental changes to system configurations to prevent recurrences and review IT Service requests and tickets; troubleshoots and resolves advanced technical issues to the extent possible. I also utilize remote administration software tools to assist customers remotely. I Identify and break down problems using structured problem resolution approaches; and works with network specialists, applications developers, system administrators to prevent recurring problems.

Credentials

Google IT Support Fundamentals [2020.07.03-no expire date]

[Credential link](#), [see certificate](#)

Mobile Testing with Appium [2021.03.26-no expire date]
