Experience

Test Automation Engineer at TayqaTech   [2020.01.15-present]

I am working at Tayqatech as a Software Test Automation Engineer. I have built a test automation framework from scratch for both our mobile and web applications using Selenium , Appium and such technologies. Generate reports, building config files and so on

- Experienced with Selenium, Appium,Appium Inspector, Selenium IDE, Extent Report
- Experienced with Java and C# (Mostly Java)
- Experienced with TestNG,its listeners and JUnit5
- Experienced with Intellij IDEA, Android Studio, Atom as well as Visual Studio and VS Code
- Experienced with Page Object Model, Page Factory, as well as Apache POI API,
- Experienced with E2E, Data Driven Testing(TDD), Keyword Driven Testing
- Experienced with JIRA tools such as: JIRA Service Management, Trello, Jira Software and Confluence
- Experienced with Dev tools such as: Android Debug Bridge, Chrome Dev tool
- Experienced UIEM to Automate random testing.
- Experienced with build tools - Maven and Gradle
- Experienced with Postman for API testing
- Experienced with SQL - inserting mock data into Db, deleting, updating for test reasons
- Testing Types: Regression, Integration, Monkey, Smoke, Sanity, Functional, Monkey

Software Quality Assurance Tester at TayqaTech   [2019.01.20-2020.02.15]

I have a passion for software quality that goes beyond just identifying bugs and ensures the product meets written and unwritten requirements, is consistent, is well designed, and is a delight to use. I thrive in fast-paced environments and am flexible in adapting to change. I execute quality assurance tests and document software defects. I use SQL for manipulating data.

IT Support Specialist at TayqaTech   [2019.01.01-2019.04.10]

As an IT Support Specialist I Ensure Help Desk tracking and asset information is accurate. I document solutions to problems and recommend fundamental changes to system configurations to prevent recurrences and review IT Service requests and tickets; troubleshoots and resolves advanced technical issues to the extent possible.I also utilize remote administration software tools to assist customers remotely. I Identify and break down problems using structured problem resolution approaches.

Certificates

Advanced Selenium: Page Objects and GUI Automation [2021.11.23]

see Certificate

Advanced Appium   [2021.04.06]
see certificate
